
Release Overview – FileFinder 11.48

Here's a snapshot of what we've delivered in this release:

- "People Deduplication Standard Report" added as part of the FileFinder standard reports
- "Industry" and "Job Function" fields added to the Placed Candidate wizard
- Users can now add people's profile pictures from LinkedIn using Web Research
- "Person Photo" option added as quick link in a Person record
- "Create Date" column added to the Person and Company Search and Lookup results view
- Added the option to make Reading Pane the default view when viewing Intelligence
- Person summary Web Profile infobox links now open directly in Web Research
- Calendar window colour has been changed to a white background
- Report Manager in Admin is now sorted by the report name by default
- Fixed an issue with Person Quick Look-up search which was slow to retrieve results
- Fixed an issue when creating a new Activity on List and Main view picking the wrong person in the list
- Fixed an issue with "Found in Similar Name" column in Person Lookup and "Found In Alias" column in Company Lookup not showing any values

New Functionality/Features and Enhancements

- **"People Deduplication Standard Report" added as part of the FileFinder standard reports**
 - Allows users to see which People records are duplicates in their FileFinder database
 - It uses the following matching logic to determine if a record is a duplicate or not:
 - Last name and Email match
 - Last name and Phone match
 - First name, Last name, Company and Job title match
 - Users can use the Person No. displayed in the report to find the duplicate records in FileFinder and then merge the records
 - The "People Deduplication Standard Report" can be found under the Management Reports section in the General Reports area
 - The report can also be easily exported to Excel after it has been Run

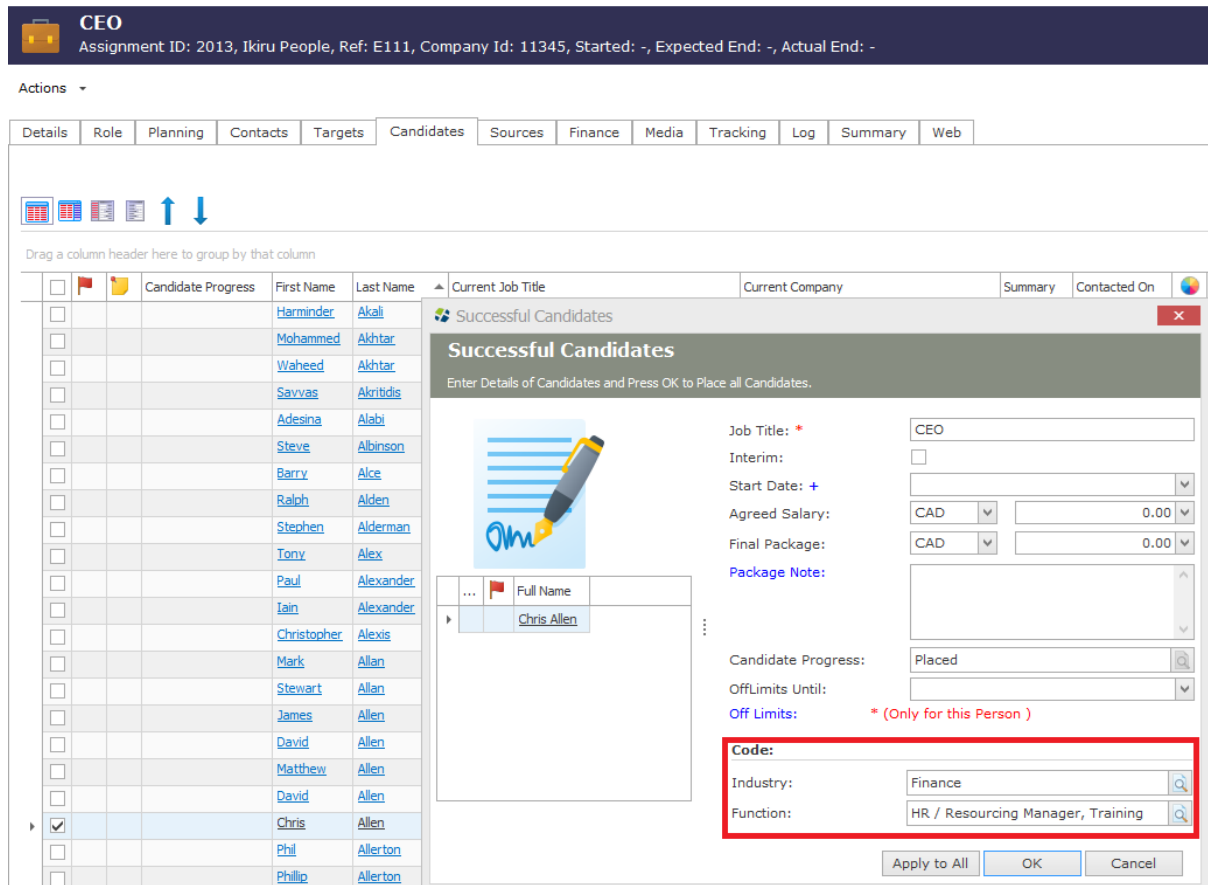

Person Potential Duplicates Report

Date Report Run: 5 March 2026

- **"Industry" and "Job Function" fields added to the Placed Candidate wizard**
 - Allows users to code Industry and Job Functions skills when placing a candidate in an Assignment
 - It will automatically code the industry based on the Company Industry codes where the candidate is being placed

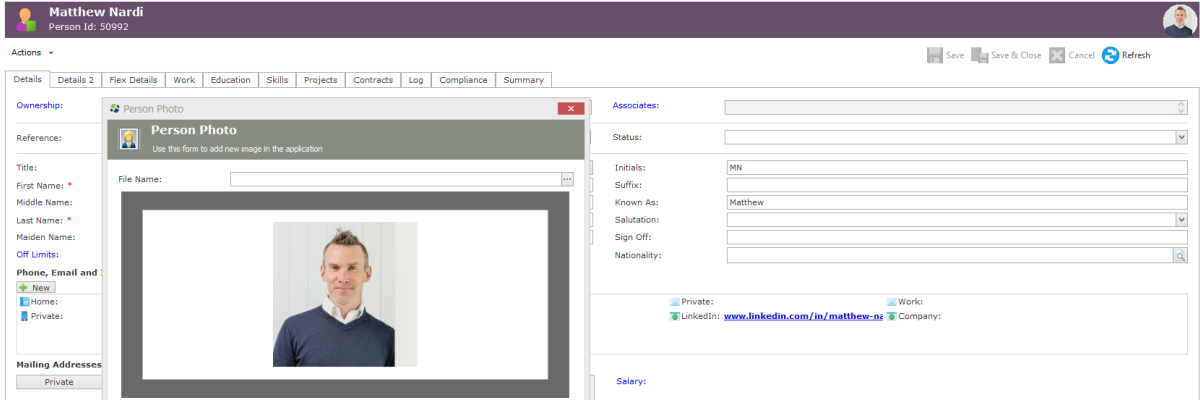

- **Users can now add people's profile pictures from LinkedIn using Web Research**
 - When you right-click a LinkedIn Profile picture a new option called "Attach Photo" has been added, this allows you to attach the picture to the person record. *Note: This works on all images from any website and not just the ones from LinkedIn*

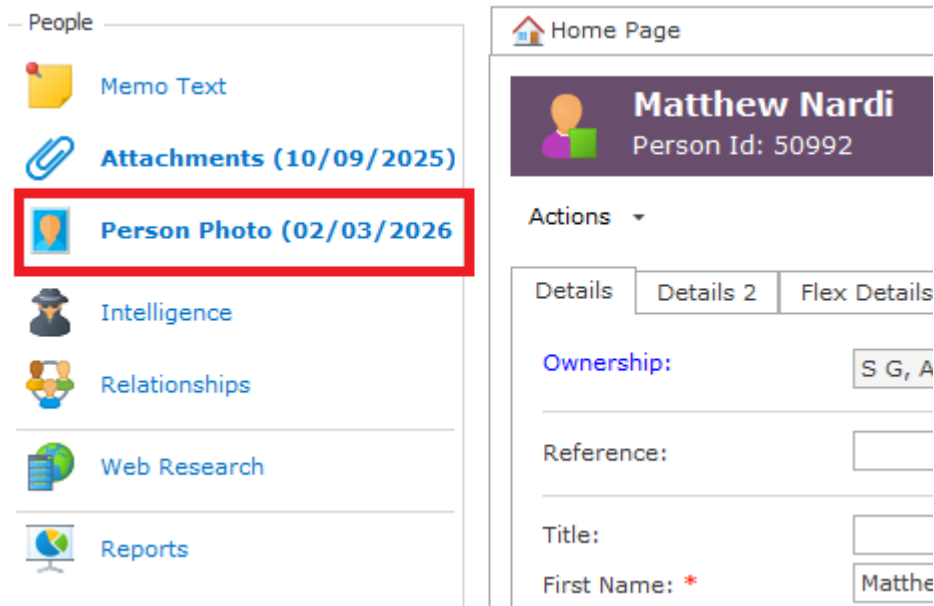

- Once the photo has been attached you can view the photo added on the person record on the right side of the person header

- The person photo can also be added manually to the person record, and it will show in the same way

- **"Person Photo" option added as quick link in a Person record**
 - Allows users to quickly add or view Person Photos. If the link is in bold it will tell you that a photo is attached to the record, it will also display the date the last photo was added

- **"Create Date" column added to the Person and Company Search and Lookup results view**
 - "Create Date" can be added using the Column chooser option when creating or editing an existing view

- Email Subject field has been removed from edit reports window as it is only used on Email Templates and had no effect on Reports

Bug Fixes

Person Quick Look-up search was slow to retrieve results

When using People Quick Look-up to find a person it could take 6 to 10 seconds to display the results

This has been fixed and the speed has been significantly improved

Creating a new Activity on List and Main view picks wrong person in the list

List and Main View

Select a person in the list that is not the first person

Select the Education or Skills tab

Create a New Activity log

It picks the first person in the list and not the one selected

This has been fixed

"Found in Similar Name" column in Person Lookup and "Found In Alias" column in Company Lookup were not showing any values

This has been resolved and it will show a value now if one exists
